23. (Amended) An on-line scheduling application system in which users are provided with a personalized web page of information comprising:

a scheduling system comprising:

a data server configured to provide television program listings including television program times, television channels, and television program titles, and non-television-related schedule information; and

a transmission server configured to provide the information from the data server to a server for delivery via the Internet in the web page; and

a multimedia system configured to:

provide the user with an opportunity to select at least one desired television genre from a plurality of available television genres;

provide the user with an opportunity to select at least one desired television-related information source from a plurality of television-related information sources, wherein the opportunity to select the desired television genre is a separate opportunity from the opportunity to select the desired television-related information source;

provide the user with an opportunity to select at least one desired non-television-related information source from a plurality of non-television-related information sources for providing schedule information for non-televised events;

Cont  
B18

display on the web page of information a grid of the television program listings including television program times, television channels, and television program titles, wherein the television program listings in the grid are based on the selected television genre and are obtained by the data server from the selected source; and

display on the same web page a region of schedule information for non-televised events that includes event titles.

27. (Amended) An on-line scheduling application system in which users are provided with personalized scheduling information comprising:

a multimedia system configured to:

provide a user with an opportunity to define a plurality of different requests wherein each request in the plurality of requests comprises a plurality of criteria;

provide the user with an opportunity to select a plurality of sources associated with each individual request of the plurality of requests and from which a scheduling application obtains scheduling information for each individual request of the plurality of requests;

provide a user with an opportunity to select at least one delivery scheme for delivering at least a portion of the scheduling information to the user;

deliver the portion of the scheduling information to the user using the selected delivery scheme; and
